

EFB Pellet

Processed Biomass Fuel Data Sheet

Parameter	Reference
Dry-basis GCV	3,800-4,300 kcal/kg
Typical form	6-8 mm pellet
Feedstock	Empty fruit bunch fibre
Typical use	Industrial boilers, co-firing, substrate applications
Handling note	Moisture variation depends on storage and logistics
Documentation	CoA and supplier documentation available by order

Commercial note: final specifications depend on supplier lot, origin, storage condition, moisture, logistics route, and buyer testing protocol. Confirm current availability and documentation before contracting.

SSM Registration No. 202601020235 (1682332-K)
